

6.12 Deer Vehicle Collisions (DVCs)

6.13 Mapping of reported DVCs, 2002 - 2013.

Reported locations of deer road casualties or related traffic collisions (DVCs) logged in SNH DVC database from 2002-2013. Incidents from 2002 to 2007 (yellow symbols) and overlaid by incidents from 2008 to 2013 (red symbols).

6.14 Breakdown of DVCs by year and roads with most reported incidents

Year	A830	A861	Other roads	TOTAL
2008	2			2
2009	2		1	3
2010	3			3
2011	1			1
2012	2	1	1	4
2013	10*	1	2	13

\*increase in DVC in 2013 partly due to publicity campaign to report incidents on the A830

6.15 88% of incidents between 2002 and 2015 occurred on the boundary with the West Lochaber DMG due partly to commercial woodland fencing. These figures, when known, contribute to the consideration and setting of cull levels.

6.16 Carcase handling / Larder facilities

6.17 Venison from Moidart is produced in line with EU Food Hygiene Regulations. Glenaladale, Glen Moidart, Inverailort and Loch Shiel have their own larder facilities that meet regulations, and venison-handling facilities at Mingarry deal with the carcasses from Ardmolich, Kyleswood, Glenuig, Eilean Shona and Shona Beag.

These larders have as standard:

- Hot and cold water
- Separate sinks for cleaning tools and hands
- Stainless steel bench
- Waste removal
- Electrical handling system with rails and hooks to limit human handling
- Elbow-operated taps
- Commodities and stocks of soap dispensers, surgical gloves, paper towels

Larder facility at Slatach, Glenaladale.
